

IQ^{POWER} Cool

IQ Power Cool is WellNetIQ’s soothing broad-spectrum cannabinoid cooling gel. Cannabinoids are known for their anti-inflammatory effects, particularly effective on the skin, or just under the skin. They can also be very effective in reducing the itching effect after a mosquito bite. When you rub the IQ Power Cool on the skin, you immediately feel the relaxing and pain-reducing effect. The irritated skin benefits from the cooling effect of the product. The added Aloe Vera gel has shown to reduce the symptoms of certain skin problems, such as psoriasis, acne or rashes. Menthol is a monoterpenoid from wild mint, that has analgesic properties. It is also effective against certain bacteria. IQ Power Cool features 200 mg of total cannabinoids. The cannabinoids are derived from the hemp plant, or in Latin *cannabis sativa*. This powerful health boosting plant features more than 100 different cannabinoids that each have their own specific beneficial effect. Of course, we source the cannabinoids from organically grown hemp in Germany. Read about all the scientific studies at our science library:

BIOAVAILABILITY

As with all (phyto)nutrients, they have to be absorbed into our body before they can exert their beneficial effects. It is known that the skin absorbs cannabinoids effectively by rubbing the gel firmly on your painful areas.

USAGE

As a daily use, use IQ Power Cool on dry skin, painful parts of your skin, or itchy areas. Rub in a generous amount. Repeat if necessary.

CONTENTS

IQ Power Cool contains 200 mg of total cannabinoids mixed with among others aloe vera leaf juice and natural menthol. Read the complete analysis of the product at www.wellnetiq.com/products/iqpowerplus/analysis
